

- 2.10. **Prof. Dr. Steven Higgins**, University of Otago, New Zealand
“Assembling a plant ecology”
Host: Thomas Hickler
- 16.10. **Prof. Dr. Jan Esper**, Department of Geography, Gutenberg University, Mainz
“European summer temperature response to large volcanic eruptions”
Hosts: Thomas Hickler & Jörg Steinkamp
- 23.10. **Dr. Jussi Eronen**, BiK-F/ Marie Curie IEF
“Paleodiversity, traits, and integrating ecology, AKA "Where a Long Time ago meets a Galaxy Far Far away”
Hosts: Andreas Mulch & Steffen Pauls
- 30.10. **Prof. Dr. Jürg Luterbacher**, Climate Dynamics and Climate Change, Justus-Liebig University Giessen
“Insights from the LOEWE Cluster ‚FACE2FACE’ - Impacts of and Adaptation to Climate change and Reductions of Greenhouse gas Emissions by 2050”
Host: Julia Krohmer
- 6.11. **Prof. Dr. Darrel Möllendorf**, Normative Orders, Cluster of Excellency at the Goethe University Frankfurt,
“The Moral Challenge of Dangerous Climate Change: Values, Poverty and Policy”
Host: Julia Krohmer & Alexandra Lux
- 13.11. **Dr. Susanne Fritz**, BiK-F, Leader Emmy Noether Junior Research Group
“Evolution of climatic niches and eco-morphological traits in birds”
Host: Steffen Pauls & Katrin Böhning-Gaese
- 20.11. **Dr. Horst Korn**, Section Biodiversity/CBD, Federal Agency for Nature Conservation, Vilm
„Biodiversity and climate change – how can scientist respond to societal knowledge demands”
Host: Julia Krohmer
- 27.11. **Katharina Methner**, BiK-F
“Stable isotope-based reconstructions of Eocene climate and topography of the North American Cordillera”
Hosts: Steffen Pauls & Andreas Mulch
- 4.12. **Dr. Katja Heubach**, BiK-F/UFZ Leipzig
“Where science meets policy to implement our findings: IPBES, CBD and Co.”
Host: Julia Krohmer
- 11.12. **Prof. Dr. Markus Pfenninger**, BiK-F & Goethe University
“Ideas on predicting genetic diversity loss under climate change: the challenge of genomic data”
Host : Steffen Pauls
- 18.12. **GrrlScientist**, Science Writer
“Review of the Year in Ecology”
Host: Bob O’Hara
- 15.1. **Tina Lüdecke**, BiK-F
“Using stable isotopes of pedogenic carbonate and mammal enamel to reconstruct Plio-Pleistocene climate and vegetation patterns of southeast African savannas (Chiwondo Beds, Northern Malawi)”
Host: Steffen Pauls & Andreas Mulch
- 22.1. **Dipl.-Biol. Uwe Zajonz**, BiK-F & Senckenberg
“Biogeographic patterns of reef fish community structure in the southeastern Arabian Peninsula”
Host: Julia Krohmer
- 29.1. **Dr. Michael Raupach**, Senckenberg Wilhemshaven, Molecular Taxonomy
“Molecular approaches in species identification and taxonomy”
Host : Steffen Pauls
- 5.2. **Prof. Dr. Florian Altermatt**, University of Zurich & Eawag.
“Diversity patterns and dispersal processes in riverine metacommunities”
Host: Peter Haase
- 12.2. **Aljoscha Kreß**, BiK-F
Emergence of the Snow Tiger: Epigenetics of the Cold Hardiness of *Aedes albopictus* (Diptera: Culicidae) and the Impact of Cold Adaptation and Diapause on Structure of the Chorion!
Host: Steffen Pauls
